"Lambs by the Litter" The Romanov sheep are from the Voga Valley, northwest of Moscow. Genetically unique to British and North American breeds of sheep, the Romanov (a "pure gene," not a "cross" of anything) used on traditional ewes will produce a "hybrid" - high performance ewe for the flock of the future and a top gaining market lamb. Quads, quintuplets and even sextuplets are normal performance for a Romanov ewe.

The North American record is seven live healthy lambs, the breed record is nine! Romanovs reach sexual maturity by the time they are 3 - 4 months old, they will breed any month of the year and combined with the aggressiveness of the newborns allow for a very high production ewe. The most practical application of Romanov genetics is in the development of the ewe flock: crossbreeding to get the high performance 1/2 Romanov ewe, the "market lamb machine," who looks like a regular sheep, is tough and has multiple lambs which live to get to market. They are the "secret" to surviving in the sheep business!

Half Diamond 401N

ROMANOV, HDA 401N, REG # U13341, TWIN, DOB: JANUARY 2, 2003
SOLD OUT IN CANADA | AVAILABLE IN CHILE THROUGH COOPRINSEM

SIRE: HALF DIAMOND 69L
DAM: HALF DIAMOND 85L

SCRAPIE GENOTYPE: ARR/ARQ RESISTANT

Owners: Dan Sinclair, Bowden, AB
website: www.romanovsheep.com
email: hdf@ocflock.com

Half Diamond 401N is a relatively large framed Romanov, perfect for use to produce crossbred commercial ewes. His dam has been a consistent producer and has an above average Ewe Index in the flock.

Half Diamond 16P

ROMANOV, HDA 16P, REG # U13579, QUADRUPLLET
DOB: MARCH 19, 2004

SIRE: VADER 293U
DAM: HALF DIAMOND 74L

SCRAPIE GENOTYPE: ARQ/ARH INTERMEDIATE

Owners: Dan Sinclair, Bowden, AB
website: www.romanovsheep.com
email: hdf@ocflock.com

Half Diamond 16P is the most productive Romanov ram we have produced. He is sired by Vader 293U, a ram selected by Agriculture Canada as an excellent representative of the Romanov breed. His dam is HDA74L, is the second highest indexing Romanov ewe in the Half Diamond Farm flock. She has weaned 13 out of 14 lambs over her 4 lambings. HDA16P will add prolificacy, hardiness and lamb survivability to any ewe flock. He is a quadruplet, raised as a quadruplet, and still maintained an adjusted daily gain of 418 gm per day.

Romanov HDA405S - NARSA Registered

HDA405S is a very solid ram. He is calm and easy to handle. He has very correct feet and legs, and passes this on to his offspring. He was born as a 4 and raised as a 3, when his dam was 6 years old. She raised 4/4 lambs as a 4 year old ewe. Multi-trait index 123. His ADG .92lb/day.
